FAMILY WINERY AND VINEYARDS

2021 AGLIANICO ROSÉ | RIVER RANCH

We respect the land where our vineyards grow - our family's connection to nature gives our wine its foundation and individuality. Distinct soil and climate coupled with responsible farming practices highlight the character of each vintage from our generational farm in Lodi, California.

GROWING SEASON

The 2021 vintage brought us the earliest start of harvest we've experienced, with our crews starting on July 26th. After our white and early red varietals were brought in to the winery, many of our red varietals were predicted to reach maturity at the same time. The compaction of the second half of the harvest season became both a challenge and priority for us. As Fall approached, the smaller fruit set, paired with consistently higher temperatures caused many red varietals to mature rapidly. Varietals such as Cabernet Sauvignon, Malbec, and Petite Sirah came off three weeks sooner than average, with slightly higher brix than targeted, although with good acidity. With all said and done, the vintage came in smaller than expected, though with outstanding quality that we are thrilled to present.

VINEYARD NOTES

One of the many varietals within Prince Vineyard is Chenin Blanc: planted in 1995, 1996 and 2012 in nine separate blocks totaling 92.08 acres. The vineyard is in the Clarksburg Appellation, with an ideal location to maintain the natural acidity and floral bouquet.

JAHANT AVA

Located in the center of the Lodi AVA, the Jahant AVA is geographically the smallest of Lodi's seven AVAs - a total size of 28,000 acres, with roughly 9,000 acres planted to vineyard. It sits on highly dissected river terraces and old floodplain deposits. The classic Mediterranean climate has Delta fog influence, and receives cold air drainage and entrapment within our vineyards.

WINEMAKER NOTES

Our 2021 vintage takes the classic Italian variety and gives it a French Provence style twist. The aroma is bursting with tropical notes of passion fruit and underripe strawberry. The first sip immediately translates these flavors on the palate and brings a crisp acidity and savory mouthfeel. The delicate, dry finish is sure to have you going back for more.

WINE STATISTICS

SOIL COMPOSITION

Fine Sandy and Sandy Loam.
Derivation Mixed Rock.

SOIL

COLUMBIA FINE SANDY LOAM 77%

- Very deep
- Found on flood plains
- Formed in alluvium
- Derived from mixed rock sources
- 10-30 ft above sea level
- Moderately rapid permeability
- Root depth limited by water table at 3-5 ft
- Occasional flooding from December to April
- Runoff is slow

EXETER SANDY LOAM 23%

- Nearly level soil
- Found on low terraces
- Formed in alluvium
- Derived from mixed rock sources
- 20-100 ft above sea level
- Moderately well drained
- Root depth limited by water table at 2-3 ft

TRELLISING

WIDE T VERTICAL SHOOT POSITIONING

- Vines trained upward with narrow fruit zone
- T-crossarm to train vine vertically
- Trellis optimized for natural air movement and speckled sunlight

CLONE

VCR 07

- Chosen based on variety, site, climate, soil, vineyard design, cultural practices, and desired wine quality
- Vigorous growth
- Good resistance to disease
- Small and compact clusters

ROOTSTOCK

ST. GEORGE

- Chosen based on resistance to soil pests, soil's texture, chemistry, depth, fertility, water availability, irrigation practice, vineyard design, and variety chosen
- High vigor
- High drought tolerance
- Prefers deep soils
